Sage 50 Accounts

Sage 50 Accounts includes improved functionality in the features you use on a daily basis, as well as access to a growing catalogue of brand-new add-ons, so you can truly customise your accounting software to the needs of your business. Features include:

+ Improved error correction

Everybody makes mistakes and there's nothing more frustrating than realising that you need to delete and start something again. You can quickly and easily edit journals, un-allocate credits and payments from an incorrect invoice and track which users have edited transactions. Meaning it has never been easier to keep your accounts accurate and up-to-date. Plus, you can feel comfortable knowing that you can quickly review what has been edited, by who and when.

+ Surfacing information

Getting the right information when you need it is crucial to running your business. Sage 50 Accounts enables users to easily and effectively analyse data without the need to source it from various parts of the software or create workarounds. Helpful columns and fields mean more efficient data analysis and reduced frustration.

+ Drill down on aged debtors and creditors

Get more control of who owes you money and who you owe money to, without the need to move in and out of different screens. A streamlined process makes it easier to get insight into your cash flow at the click of a button.

+ Streamlined dialogue boxes

Streamlined dialogue boxes put the power of Sage at your fingertips. It is easier than ever for you to find the information you need quickly, and work on it effectively, without having to learn or remember what to do.

+ User interface consistency

A streamlined and organised workspace is important to everyone and that should not stop at your accounts software. Sage 50 Accounts enables you to customise exactly what you want to see when using the programme and that will be remembered when you log out. So, no more spending time re-setting your display to fit how you work.

+ How can you enhance the power of Sage 50 Accounts?

Sage 50 Accounts is developed to work seamlessly with a catalogue of add-ons, like Credit Hound Express for example, so you can customise your business process and truly optimise how Sage 50 Accounts works for you.

Connected Accountants
Seamlessly work with your accountant in real-time - comes as standard as part of Sage Drive.

Connected Users
