

**M+A Partners have been offering specialised accountancy services to agricultural businesses and landowners for over a century and during that time we have gained a wealth of experience in dealing with issues faced by the agricultural sector.**

From small farms to large estates, our knowledgeable team offers a forward looking, proactive and strategic approach.

It is our priority to help you make informed decisions that work long term. Succession planning remains a key component to ensuring the longevity of many farming enterprises. We work collaboratively with families and owners to ensure that any such plans are tax efficient and tax reliefs are optimised.

We recognise that there is a growth in farm diversification, and with this comes associated business and tax implications. Our team is here to provide expert advice and tax planning as you embark on, or look to develop, non-farming ventures as an additional source of income.

Increasingly, landowners and farmers are looking to Natural Capital projects to diversify and further maximise cashflows and land values. We work closely with our clients to navigate this evolving marketplace and ensure that the wider tax implications of any such decisions are considered.

## Together we add value

---

Our belief is that by asking the right questions and working together, we introduce efficiencies, optimise tax reliefs and ensure you are best placed to overcome challenges and harness opportunities. We are collaborative, working with you, and other external advisers and stakeholders to ensure a joined-up approach that delivers the service you are looking for.
