Innovation Tax Relief - Research and Development (R&D) tax credits

M+A Partners has been helping clients to grow their businesses and achieve their ambitions for over a century - and we're immensely proud of our history.

We are a forward-looking firm with an emphasis on innovation, new technology and finding pioneering ways to give our clients the best possible service.

Our Norfolk-based firm is led by nine partners who are some of the most high-profile and well-respected experts in their fields locally, supported by a talented team of over a hundred staff.

We have a well-earned reputation for building excellent relationships with clients and the wider business community. That has always been, and continues to be, our number one priority.

There are many opportunities in the apparel and textile industry for R&D tax credits. It has been our experience that companies often miss out on the valuable relief available under the R&D relief scheme as they view their potentially qualifying work as '*business as usual*.'

R&D tax credits do not only apply to the tech and science industries and it is important you have the support and knowledge to claim the relief you are entitled to. Innovation is part of your industry and your efforts to stay competitive could present a great opportunity for access to R&D tax credits.

Below are a few examples of activities in your sector that would potentially qualify for R&D tax relief. This list is not exhaustive so please speak to one of our specialists to discuss your position.

Example of activities that could indicate an R&D project:

- + Designing new garments and apparel.
- + Creating new shoe designs.
- + Designing innovative shoe fit and comfort techniques.
- + Generating prototypes and fit samples of new products for testing and validation.

- + Developing new woven, knit, or non-woven textiles.
- + Developing new or improved chemical or topical treatments.
- + Developing new or improved manufacturing processes.
- + Design and development of scaled up manufacturing processes.

Next step

If you think you have undertaken projects that exhibit the hallmarks referred to in this factsheet, why not have an initial discussion with one of our specialists (details right) to see how you might be able to benefit from this generous regime.
