R&D for Small and Medium Enterprises

Innovation Tax Relief - Research and Development (R&D) tax credits

The UK government have introduced several incentives to encourage UK companies to undertake R&D activities. One such incentive is the R&D regime for Small and Medium Enterprises (SME), which is considered in this factsheet.

The Relief

R&D relief for qualifying revenue expenditure increases the amount that is deducted from taxable profits to 230% for expenditure incurred by an SME.

Large companies are subject to a separate regime which is beyond the scope of this fact sheet.

Where an SME is loss making in a period in which qualifying expenditure is incurred, it can surrender this loss in exchange for a payable credit - HMRC will make a cash repayment to the business.

Cap on Relief

Note that for accounting periods beginning on or after 1 April 2021, the amount of payable credit that a company can receive in any one year will be capped at £20,000 plus three times the company's total PAYE and National Insurance contributions liability for that period. There are exemptions for companies holding IP and with less than 15% subcontractor costs or externally provided workers.

Example

A Ltd is an SME which incurs qualifying R&D expenditure during the year ended 31 March 2021 of £100,000.

If A Ltd is profitable in the period, it will be able to deduct a total of £230,000 from taxable profits. Assuming a corporate tax rate of 19%, it would **reduce A Ltd's corporation tax liability by £43,700**, meaning the company gets an effective rate of tax relief of 43.70% on the qualifying expenditure incurred.

If A Ltd is loss making in the period, the £230,000 can either be carried forward and set against future profits in the company; or it can be surrendered for a payable credit at a rate of 14.50%. This would result in a **cash repayment of £33,350**, meaning an effective rate of relief of 33.35% of qualifying R&D expenditure.

Considerations

Qualification of R&D activities

The first step in preparing an R&D claim is to establish which activities meet the definition of R&D for tax purposes.

To qualify, a product or process under development should utilise new techniques or information which increase the capabilities of the industry in which the company operates. The knowledge employed does not have to be new, but it does have to represent an improvement on what went before. Essentially, a qualifying R&D project will be looking to resolve an uncertainty blocking the realisation of the new product/service.

Our approach, based on guidance issued by HMRC, is to understand the following:

- + What is the advance sought?
- + What are the scientific or technological uncertainties involved in the project?
- + How and when were these uncertainties overcome?
- + Why was the knowledge being sought not readily deductible by a competent professional working in that field?

Quantifying the expenditure

Once the qualifying projects are identified, we can move toward quantifying the amount of qualifying expenditure, which must be:

- + Revenue and not capital in nature. (Please note: separate relief is available for qualifying capital expenditure in the form of enhanced capital allowances).
- + The amounts must not be incurred in carrying out activities contracted to the company by another person (however relief may be available under the Research & Development Expenditure Credit).
- + The expenditure must not have been met by another person (if the R&D project is funded in whole or part by 'State Aid' such as government grants, it may be that none of the expenditure would attract R&D relief).

You must make a claim for R&D relief in your company tax return. The normal time limit for making a claim is two years after the end of the accounting period in which the qualifying expenditure was incurred.

As of 1 April 2021, HMRC now requires an additional form CT600L to be filed with the claim.

Next step

If you think you have undertaken projects that exhibit the hallmarks referred to in this factsheet, why not have an initial discussion with one of our specialists (details top right) to see how you might be able to benefit from this generous regime.
